

## Behavior-Based Safety (BBS) Training – Rail & Metro

**Duration:** 3 Days | **Mode:** Regular / Corporate Training | **Eligibility:** Employees, Industrial Workforce, Engineering Graduates from Recognized Universities

### About the Programme

The **Behavior-Based Safety (BBS) Training – Rail & Metro** is a specialized 3-day programme designed to enhance safety culture within the rail and metro sector by focusing on human behavior, workplace attitudes, and proactive risk management. This training aligns with global best practices and safety management frameworks, ensuring participants gain the knowledge and skills to foster a safer, more productive work environment.

BBS emphasizes the role of human actions in accident prevention and helps organizations transition from a compliance-driven approach to a culture of **personal accountability, observation, and positive reinforcement**.

### Key Learning Objectives

- Understand the principles and fundamentals of **Behavior-Based Safety (BBS)**.
- Learn the psychology of workplace safety and the impact of human behavior on safety performance.
- Identify at-risk behaviors and implement effective observation and feedback techniques.
- Build strategies to promote **safety leadership, ownership, and accountability** across all levels of the workforce.
- Enhance **safety culture** within rail and metro organizations through proactive behavioral interventions.
- Gain insights into **case studies and real-world applications** in rail and metro environments.

### Who Should Attend?

- Employees and professionals working in **rail & metro operations, maintenance, and safety divisions**.
- Industrial workforce seeking structured knowledge of workplace safety culture.

- Engineering graduates aiming to build specialized expertise in **rail & metro safety management**.
- Safety managers, supervisors, and team leaders who play a role in implementing **organizational safety practices**.

### **Programme Highlights**

- 3-day intensive training led by industry experts with **extensive rail and metro safety experience**.
- Interactive sessions, workshops, and role-play activities for **real-time application of concepts**.
- Global best practices adapted to the **Indian Rail & Metro context**.
- Certificate of Completion, recognized for professional and organizational advancement.

### **Outcome of the Training**

Upon successful completion, participants will:

- Demonstrate practical knowledge of **behavior-based safety systems**.
- Contribute to reducing accidents, near-misses, and unsafe acts in the workplace.
- Strengthen their organization's safety culture and compliance with industry standards.
- Be prepared to implement BBS initiatives tailored for **rail & metro operations**.
