

MBA IN RAIL TRANSPORT ECONOMICS

(2 Years | 4 Semesters | Eligibility: Any Graduation)

Course Overview

The MBA in Rail Transport Economics is a unique postgraduate program designed to develop professionals with strong expertise in the economic and managerial aspects of the railway and transport sector. With the rapid expansion of rail infrastructure, metro projects, and logistics networks across India and globally, there is an increasing demand for skilled managers who understand the complex interplay of economics, transport policy, and sustainable growth in the railway industry.

This program blends core management principles with specialized knowledge of transport economics, enabling graduates to contribute effectively to policy-making, project evaluation, operations management, and financial planning in the rail and urban transport ecosystem.

Key Features of the Program

- **Comprehensive Curriculum:** Covers management, transport economics, railway operations, project finance, logistics, and regulatory frameworks.
- **Industry-Oriented Approach:** Focus on real-world case studies, research, and practical applications.
- **Expert Faculty:** Led by academicians, economists, and industry professionals from the rail and transport sector.
- **Career-Focused Learning:** Designed to prepare students for leadership roles in railways, metro corporations, transport consultancies, and government agencies.
- **Workshops & Seminars:** Regular interactions with industry leaders, policymakers, and global experts.
- **Internship & Project Work:** Exposure to live projects, rail infrastructure development, and economic analysis of transport systems.

Eligibility

- Any Graduate from a recognized university (from any discipline: Arts, Science, Commerce, or Engineering).
- Candidates with a keen interest in railways, transport, economics, logistics, or infrastructure will find the program especially beneficial.

- 2 Years (4 Semesters) – Full-time postgraduate program.
