

MBA in Rail Safety Management

Shaping Leaders for a Safe, Sustainable & Smart Rail Future

The MBA in Rail Safety Management is a specialized two-year (4-semester) postgraduate program that prepares ambitious graduates to take on leadership roles in rail safety, security, and operations management. With rapid global expansion in metro rail, high-speed trains, and advanced railway infrastructure, the demand for skilled safety professionals is at an all-time high – and this program is designed to place you at the forefront.

Program Highlights

Comprehensive Curriculum covering Rail Safety Systems, Risk & Disaster Management, Safety Audits, Railway Operations, Governance, and Transport Policy.

Blend of Management & Technical Knowledge – Equips you with skills in strategic planning, safety regulations, crisis response, and modern transport technologies.

Industry Exposure through seminars, workshops, guest lectures, and project-based learning with experts from railways, metro corporations, and safety authorities.

Career-Oriented Approach – Focus on employability with real-world case studies, field visits, and internship opportunities.

Global Relevance – Prepares students for career opportunities in India as well as with international metro projects, transport regulators, and infrastructure companies.

Career Opportunities- Graduates of this program can pursue diverse roles, including:

Rail Safety Manager / Officer

Safety & Risk Consultant

Metro Rail Project Manager

Safety Auditor & Compliance Specialist

Transport Governance and Policy Advisor

Disaster Management & Emergency Response Leader

Key Details
