Certificate Course in Disaster Management

Course Overview

The Certificate Course in Disaster Management is a specialized six-month program designed to prepare individuals with the knowledge, skills, and strategies required to effectively respond to, manage, and mitigate disasters. In today's rapidly changing environment, disaster preparedness and risk reduction are crucial for safeguarding lives, infrastructure, and communities. This course equips learners with practical training and theoretical understanding to handle natural and man-made disasters with efficiency and professionalism.

Through a carefully structured curriculum, participants will gain insights into disaster preparedness, emergency response systems, rehabilitation, and resilience-building. The course emphasizes real-world case studies, scenario-based learning, and hands-on exercises to create disaster-ready professionals who can serve in government, non-governmental organizations (NGOs), industries, and international humanitarian agencies.

Eligibility

10+2 (Higher Secondary)

ITI Certification

Diploma Holders

Any Graduation (from a recognized university)

Mode & Duration

Mode: Regular Classroom / Blended Learning

Duration: 6 Months
