PG Diploma in Industrial Safety Management

Eligibility: Diploma / Any Graduation

Duration: 1 Year (2 Semesters)

About the Course

The Post Graduate Diploma in Industrial Safety Management is a specialized one-year professional program designed to equip learners with advanced knowledge and practical skills in workplace safety, occupational health, environmental protection, and risk management.

As industries expand rapidly across manufacturing, construction, energy, mining, oil & gas, and transportation sectors, the need for qualified safety professionals is growing worldwide. This program prepares learners to identify hazards, prevent accidents, comply with legal frameworks, and promote a safe working environment, making them indispensable assets to employers.

Why Choose This Course

Industry Demand: Safety officers and industrial safety experts are in high demand globally due to regulatory compliance and international safety standards.

Practical Learning: Focus on real-life case studies, industrial visits, and hands-on training in safety protocols.

Career-Oriented Curriculum: Aligned with national and international occupational safety standards (OSHA, ISO, ILO guidelines).

Versatile Career Scope: Opportunities across sectors including oil & gas, railways, shipping, construction, aviation, power plants, mining, and manufacturing.

Course Highlights

Fundamentals of Industrial Safety & Risk Assessment

Occupational Health & Hygiene Practices

Fire & Safety Engineering Techniques

Disaster & Emergency Management

Legal Framework of Safety (Factories Act, EHS Laws, etc.)

Environmental Safety & Pollution Control

Safety Management Systems & Auditing
