**JOIN THE SAFETY TEAM
THAT SAVE OUR NATION**

Our Mission

To enable entities, enterprises, and institutions to realize their goals by providing a single platform that offers access to affordable, tech-enabled safety & security, facility management, and related solutions.

Our Vision

To become the most reliable integrated security and facility management platform driven by innovation, while contributing to the establishment of a skilled, efficient, secure, and vibrant India.

SAFETY & SECURITY SURVEILLANCE SYSTEM

We, at **AIRSC SECURITY SERVICE BUREAU**, offer integrated services to address security challenges related to asset and property protection against unauthorized access, misuse, damage, and threats faced by both enterprises and the government.

AIRSC SECURITY SERVICE BUREAU's Integrated Safety and Security System (ISS) provides end-to-end safety and security coverage to Railways & Metro Railways. The system includes CCTV Coverage, Personal Baggage Screening Systems, and Explosive Detection & Disposal Systems.

Indian Railways and Metro Rail are committed to providing a secure, safe, and comfortable journey for all passengers. The provision of safety, security, and other facilities for passengers is a continuous process, and every effort is made to ensure these for railway travelers.

ALL INDIA RAIL SAFETY COUNCIL

AIRSC SECURITY SERVICE BUREAU Security Operation Center Services are built on cutting-edge technologies and managed by a highly qualified team that operates 24x7. The team monitors, analyzes, and responds to security problems effectively. Managed services from **ASSB** help strengthen your organization's security posture by identifying and resolving significant network vulnerabilities. ASSB is one of the most sought-after providers for managing customer environments, boasting one of the most advanced and highly sophisticated Security Operation Centers in India.

AIRSC SECURITY SERVICE BUREAU is a rapidly growing integrated safety, security, and facility management service provider, dedicated to serving various sectors with affordable security and facility management services, enhanced by cutting-edge technology.

SAFETY
IS OUR CORE VALUE

Intelligent Security Surveillance System in Railways

Public Transportation System Safety

Public transportation system safety is a critical modern issue, with concerns about terrorist attacks impacting the lives and property of citizens. **AIRSC SECURITY SERVICE BUREAU** offers railway PCs capable of integrating related equipment to not only meet safety surveillance requirements but also provide connectivity with vehicle facility applications, creating a fast and convenient integrated solution.

Railway PC for Surveillance System **AIRSC SECURITY SERVICE BUREAU** provides solutions such as railway PCs designed with anti-vibration dual storage devices and functionality to record and upload data, which can be transmitted to a control center. Additionally, these PCs offer a stable and reliable solution with four Ethernet ports, enabling connections with multiple surveillance switches simultaneously.

Real-Time Passenger Information

Train arrival and departure times are critical aspects of train management. **AIRSC SECURITY SERVICE BUREAU's** railway PCs are a valuable asset with real-time GPS capabilities and connectivity between trains and satellites, facilitating the transmission of timing, digital signage, and other essential passenger information.
